## PROFILE

As a recent graduate with a diploma in Mechatronics Engineering, I am eager to embark on a dynamic career as a MERN Stack Developer. Leveraging my strong foundation in engineering principles and a passion for full-stack development, I aim to contribute innovative solutions and collaborate in a growth-oriented environment, while continuously expanding my skills in web development technologies.

## PROJECTS

### BRIO

webflow Landing Page

[Live](#)

- Designed and developed a high-converting landing page using Webflow to promote business growth services. The page effectively communicated key benefits, generated leads, and increased website traffic through targeted calls to action and persuasive copywriting.

### TMART

React js, Firebase, Node js, Express js, MongoDB, Daisy UI, tanstack query,

[Live](#) | [Github Client](#) | [Github Server](#)

- Created a responsive e-commerce platform with React, React Router, and Tailwind CSS.
- Integrated Firebase for user authentication and Stripe for secure online payments.
- Developed a Node.js backend with MongoDB for efficient data storage and retrieval.
- Implemented role-based authentication, enabling administrators to manage orders and products.

### TRALOVER
